EDUCATION

Lahore University of Management and Sciences (LUMS)

Bachelor of Science in Computer Science

Lahore, Punjab

Sep. 2023 – May 2027

- **Major GPA:** 3.52
- **Relevant Coursework:** Network Computing, Network Security, Applied Cryptography, Human-Computer Interaction, Software Engineering, DSA, Operating Systems

EXPERIENCE

Johri Technologies | Remote

Technical Consultant

Feb 2026 – Present

- Supported CNAPP, Azure VMware Solution (AVS), Cohesity, and Wiz consulting engagements through runbooks, controls matrices, LOE estimates, architecture notes, and client-facing technical deliverables.
- Contributed to proposal development and deployment planning across enterprise cloud environments.

SaaS Security Auditor

May 2024 – Aug 2024

- Led security audits for 5 SaaS vendors by designing assessment frameworks around identity, encryption, incident response, and compliance; documented 40+ control gaps with risk classification and delivered remediation-focused reports that improved audit closure rate by 30%.

Cloud Security Associate (CSPM Management)

Oct 2023 – Apr 2024

- Developed and validated 80+ AWS RQL policies for Prisma Cloud, building custom sandbox environments with misconfigurations to test detection logic and enforce MFA, least-privilege, and encryption standards.
- Built 33 Azure CSPM policies via API reverse-engineering and created onboarding docs that halved ramp-up time.

Lahore University of Management and Sciences (LUMS) | Lahore, Punjab

Full-Time Teaching Assistant, Pakistan Studies (SS102)

Aug 2025 – Present

- Co-manage course logistics with the instructor while mentoring students toward critical, analytical engagement with Pakistan's historical and social contexts.

Full-Time Teaching Assistant, Cloud Development

Jan 2026 – Present

- Manage the course Azure subscription, student roles, resource groups, and cloud access while resolving infrastructure issues and evaluating assignments on secure deployment, hub-spoke VPNs, and storage pipelines.

RESEARCH & PROJECTS

Studying the Footprints of AI Coding Agents in Blockchain Repositories | Co-author, MSR Mining Challenge 2026

- Empirically analyzed 497 AI-agent pull requests across 162 blockchain repositories, isolating agent contribution patterns in a security-critical software domain.

Network Security Labs | Python, FastAPI, Oracle Cloud, GDB

Jan 2026 – Apr 2026

- Built and secured a multi-tier billing application on Oracle Cloud with authentication, session management, OAuth-style identity flows, and attribute-based access control; also analyzed CSRF/XSS and memory-corruption exploits including buffer overflows, return-to-libc, and ROP using GDB.

Salahiyat: Privacy Literacy for Pakistan's Elderly | Figma, HCI, User Research

Feb 2026 – Apr 2026

- Co-led an HCI project on digital fraud resilience for older adults in Pakistan, synthesizing interviews/surveys into the "Salahiyat" Figma prototype with guided onboarding, voice assistance, and privacy-learning flows.

Cabinets Web SPA | React, TypeScript, React Router, Tailwind CSS

Jul 2025 – Aug 2025

- Delivered a React/TypeScript SPA for a live client website with responsive layouts and conversion-focused UX.

TECHNICAL SKILLS

Languages & Frameworks: Python, C, C++, HTML/CSS, React.js, FastAPI

Cloud & Security: AWS (IAM, S3, EC2, KMS, Redshift, GuardDuty), Azure, Network Security Groups, Oracle Cloud, Prisma Cloud (RQL), CCSK

Tools & Platforms: Git, Docker, Linux, GDB, Bash scripting, Figma, LaTeX
